# About us

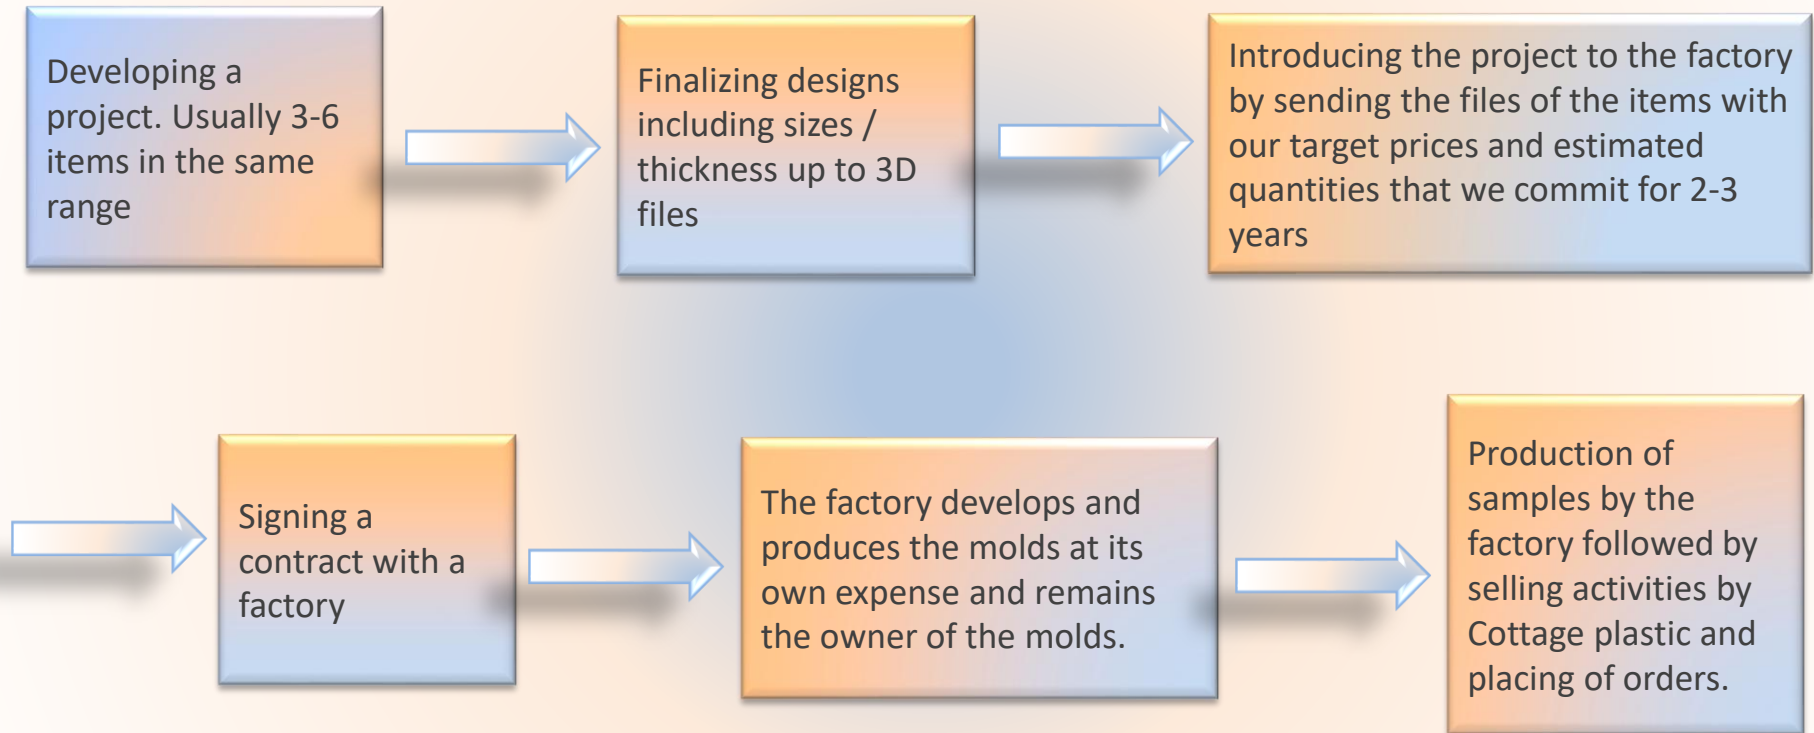

- ❑ **Cottage Plastic Ltd.** was founded in 2005.
- ❑ We create customized, stylish and practical goods for food storage, homeware and serveware which are sold worldwide.
- ❑ Cottage Plastic started as a company producing plastic items in Israel. Since 2015 the company has increasingly expanded its product line, through its brand name **Klicbox** entirely designed and developed in Israel.
- ❑ Currently products are manufactured at 3 factories in Vietnam and 1 factory in Cambodia. With over 25 years of industry experience, our company takes great care in implementing best manufacturing practices, upholding lead times and production deadlines.
- ❑ We always comply with our commitments regarding payments and undertaken agreements. It is important to declare that our relationship with the factories are lasting for many years. We trust our partner-factories and work with them closely and openly.

**Important:** all our items are made **exclusively** for us.

Our philosophy:

creating simplicity by designing and manufacturing high quality plastic products.

# Working with production houses

# Our focuses

## Recognizing Market Needs

We are in the market, with the clients & buyers. **We** are there to **understand the market needs**, what is being sold and analyze the prices.

## Designing & Developing

We are studying the products with our design department and leading them to perfection with the best item parameters in order to reach our buying and selling prices. **We register our design.**

## Contracting with Factory

We select the factories according to their machine capabilities, working standards (ensuring the factory has passed the audits, like SMETA and etc.) and prices.

## Commitment to long-lasting cooperation

We see the factory as a key part of our activities. We are sure that in order to create a long-lasting cooperation, the process shall be profitable for both the factory and the company. **We are interested only in committing to long-lasting successful cooperation from both sides.**

## Shipments

All our shipments are going directly from the factory to our clients. We always buy under F.O.B. terms and we handle the shipments. Usually all our shipments are by 40F HC containers.
